The NEW ExStik™ Conductivity/TDS/Salinity Meter

Waterproof meter with built-in Temperature

Extech's NEW ExStik™ Model EC400 incorporates dynamic cell constant technology which allows one highly accurate conductivity cell to measure all ranges for Conductivity, TDS, and Salinity. Measurements can be made in selectable units of μS , mS, ppm, ppt, mg/L, and g/L. Conductivity or TDS plus Temperature measurements are displayed on a large 2000 count display with bargraph which shows the continuous changes in Conductivity. A built-in memory stores and recalls 15 readings. Features of Model EC400 include Data Hold, Auto shut-off, low battery indication, automatic temperature compensation, adjustable conductivity to TDS ratio factor, and electronic self calibration on power up. Complete with meter and conductivity cell, protective sensor cap, four SR44 button batteries, and neckstrap.
