## **Extech Instruments Announces True RMS Plant Maintenance Electrical Test Kit**

**All the tools necessary for installation and troubleshooting electrical equipment**

Extech's New Plant Maintenance Electrical Test Kit, Model TK430, has been specifically assembled for plant and process professionals who install, troubleshoot, and repair electrical equipment.

The kit includes three primary instruments and is assembled into a convenient carrying case.

1) The Extech 430 True RMS, auto ranging multimeter with 11 functions including capacitance, frequency, and duty cycle. The 4000 count display is backlit. A Type K probe is included in the kit for contact temperature measurements.

2) The 400Amp AC Clamp-on Meter (Model MA200) measures AC current to 400A, AC/DC voltage to 600V, and resistance to 20M  $\Omega$ . The compact size allows the meter to be used in tight locations.

3) A non-contact AC voltage detector, Model 40130, fits into outlets or against wire insulation.

The TK430 Test Kit is offered at a discounted rate of \$99.00 and is available through our nationwide distribution network.

Extech Instruments is a privately held corporation whose high-value, handheld test instruments are available through national catalog houses and regional stocking distributors. For the name of a local distributor log onto [www.extech.com](http://www.extech.com), email us at [extech@extech.com](mailto:extech@extech.com) or call us at 1-781-890-7440.
